

# Momi House

## [2nd Floor]

Momi House 2nd Floor is the only male floor in Momi House, and is home to 28 residents ranging from freshmen to seniors (as of May 2026). What makes our floor special is the way everyone respects each other's individuality. We know how to have fun to the fullest, but when it's time to be serious, we take things seriously — that balance is one of our greatest strengths!

While we do have a few basic rules that are necessary for dorm life, we also value freedom and individuality, allowing everyone to live comfortably in their own way.

To those of you who are interested in ICU dormitory life: why not join the unique community of Momi House 2nd Floor, grow as an individual, and help create the culture of our floor together with us?

## [3rd Floor]

We are the third floor of Momi House, glowing brilliantly in gold at the very heart of the building. If your curiosity calls, then step inside. The first thing you'll notice upon arriving is the comforting smell of delicious food drifting from the kitchen, paired with a softly lit hallway that feels calm and safe. This is a floor where people love to cook and gather, step into the kitchen, and you'll find friendly smiles and warm greetings waiting for you. How lively it is, almost irresistibly so. What makes this floor truly special is its balance: the vibrant, family-like energy of shared laughter and conversation, alongside the quiet serenity of your own private space. It is, in a way, like Starbucks... never intrusive, yet never lonely. And here, perhaps most importantly, you may find friends who truly understand you. So come, new companions! Let's create a rich and unforgettable ICU life together.

### [4th Floor]

About 30 girls with various backgrounds and personalities are living together in Momi 4. Regardless of grade, we're able to form relationships with each other like we're real sisters!

Life in Momi 4 is really fun, and we do things like go out, exercise, and cook together. Don't you want to experience life in Momi 4? We're looking forward to seeing you :)

### [5th Floor]

The 5th floor is a peaceful and welcoming community with a calm atmosphere and residents who enjoy keeping the space clean!

People from different grades get along well, and before you know it, everyone gathers in the kitchen or living room to chat together. By living in the same environment, you can build close friendships through cooking together, watching TV, or even relaxing after a bath. At the same time, everyone also respects each other's personal time and space. Start your fun dorm life on the 5th floor!

### [6th Floor]

If we had to describe the vibe of Momi 6 in one sentence, we would say it's a floor where everyone can find a place to belong. Whether someone enjoys being social or prefers a quiet, personal rhythm, Momi 6 allows both—without forcing anyone into one style. Here, we want to explain what makes Momi 6 feel so unique to us, and why we think it truly has room for everybody.

First, there is the location. Momi 6 is the highest floor among the dorm floors where undergraduates can live, and in a way, it feels slightly removed from the “reality” of the ground below. When the sun starts to

set in the late afternoon, the view from the window opens into a sky and landscape so beautiful that it cannot be fully captured in a photograph. There are moments when we simply pause and look, and that quiet luxury becomes part of everyday life.

Second, Momi 6 is genuinely international and gender-free. Students of many nationalities live on the same floor, and differences in language, background, and values are part of daily life. In addition, people live together regardless of gender or gender identity. Because of this, “diversity” here is not just a slogan or a word people use—it is something we experience through real interactions and shared living.

At the same time, Momi 6 is generally a friendly and talkative floor. Conversations happen naturally in the hallway or lounge, and small exchanges often grow into real connections. However, because everyone has a single room, the floor also respects personal space. When we need to rest, reset, or simply be alone, we can do so at our own pace and on our own terms. The choice—to connect or to step back—is respected.

In that sense, we think the core of Momi 6 is freedom: the freedom to socialize, and the freedom to recharge privately. Because both are equally accepted, Momi 6 becomes a place where many different kinds of people can feel at home.

### **[7th Floor]**

The Momi 7th Floor is exclusively for Graduate students. We are from all around the world and have different backgrounds, so you will be able to experience variety of cultures. We sometime hold parties where you can eat the food around the world. Because our floor is the highest floor in the all dorms, you can see the beautiful Mount Fuji from the kitchen when the sky is clear! We look forward to spending time with you!
