### <Restriction levels and the countermeasures>

1) Restriction levels shall be judged by considering the status of spread or the control of infection nationwide and in the Tokyo metropolitan area comprehensively, as well as the level of requests issued by the government and other authorities.

2) Judgments on the restriction level shall be made by the University with reference to the above guidelines. The specific countermeasures to further activities, as well as measurers for items not listed in the above, shall be deliberated and determined by the related organizations, depending on the content.

Please note that the above restriction levels and measures are provided as guidelines only. Measures that are not stated above may be taken after comprehensively considering the situation.
